

S1 Physics: Density, Pressure and Buoyancy

Competency: Matter States and Properties | Difficulty: Intermediate | Duration: 40 min | Material #42

Learning Overview

Calculates density, explains pressure in fluids and applies Archimedes' principle and Pascal's law.

Learning Objectives

- Understand the core concepts of Matter States and Properties.
- Apply learned techniques to solve related problems.
- Connect this topic to real-world Rwandan contexts.
- Build mastery toward Physics Grade S1 proficiency.
- Prepare for competency assessments and national exams.

Study Notes

Use this space to write key concepts, formulas, and worked examples.
